(54) Title: A METHOD FOR PROVIDING OF CONTENT DATA TO A CLIENT

(57) **Abstract:** The present invention relates to a method for providing an interoperable digital rights management system for content data on a client based on synchronization technology, the method comprising the steps of: - receiving of a selection of content data from the client, - generating of an XML file having a defined DTD format, the XML file comprising license information and a locator for the content data, - sending of the XML file to the client, synchronizing any license status relates data produced on the client back to the server.
